

Homework 2

What shows better correlation between number of Covid cases to Income Statistics or population density for New York City per zip code. Show the relationship through NYC map and scatter plot.

- Retrieve NYC Shapefile with zip code.
- Retrieve demographic and income data for each zip code.
- Provide 500 words analysis of your maps produced.

- Data can available on
- <https://opendata.cityofnewyork.us/data/>
- <https://github.com/nychealth/coronavirus-data>
